THE COW OF COWS

RSEY COWS are common enough—but Simply Sybil's Pallas is a J breeder's dream come true. Near perfect in every respect—wonderful body, level top carrying out well both ways, deep veins, marvelous udder in texture and attachment—fully worthy of her proud title, National Champion. She is the Cow of Cows.

This magnificent Jersey Champion is Nature at her peak-a creature gifted with the vital spark that only Nature can supply, a natural balance of all the elements required in the making of a champion. This natural balance of vital elements is the principal difference between Simply Sybil's Pallas and a common cow-the difference between the best and the rest in almost everything. And here's another example of the natural balance that makes

true quality-Natural Chilean Nitrate. Into this nitrate nitrogen, Nature blended her own secret balance of vital impurities, many minor elements over and above its nitrogen. And Nature herself, aged, cured and mellowed this product through countless centuries in the ground. That is why Natural Chilean stands out a quality fertilizer by every test, in the scientist's laboratory or the practical test in the farmer's fields. It is the safe, sure, balanced food for

Natural Chilean contains almost two score of major and minor elements such as boron, magnesium, manganese, iodine, calcium, potassium, etc-each a vital element in growth and healthy development of plants.
